

What is the fund's objective?

The objective of the STANLIB Global REIT Index Feeder ETF is to track the FTSE EPRA/NAREIT Global REIT Index ("the Index") as closely as possible, in South African Rand.

What does the fund invest in?

The fund is a feeder fund and as such it invests in the iShares Global REIT ETF. This underlying fund tracks the Index and aims to replicate the performance of the Index. The FTSE EPRA/NAREIT Global REIT Index is designed to track the performance of listed real estate companies and REITs worldwide. The Index is rebalanced quarterly.

The fund may also hold a small portion in cash instruments and listed derivatives to effect efficient portfolio management.

What possible risks are associated with this fund?

Risks include general market conditions and market volatility, company specific risk, country specific risk, exchange rate risk, economic and political risk.

Risk Rating				
Conservative	Moderately conservative	Moderate	Moderately aggressive	Aggressive

Who should consider investing in this fund?

- Investors who seek broad exposure to global property in South African Rand
- Investors who seek global property exposure without foreign exchange tax clearance
- Investors who seek a low cost global property fund
- Investors who seek a simple and transparent investment process that invests in liquid, listed securities
- Investors who seek equity market exposure that blends well with other investment strategies to reduce total costs and diversify risk
- Investors who are willing to take a long term view as this fund is aggressively risk profiled and investors should expect some volatility in the shorter term

What is the suggested investment period?

Five years or longer.

What are the costs to invest in this fund?

Portfolio charges including VAT:

	Class A
Manager annual fee	0.20%

Fund review

The fund performed in line with the index and underlying fund since the inception date of 14 March 2018. Non-US real investment trusts outperformed US REITs in this first quarter. US REITs delivered a return of around -7.4% and non-US delivered -1.3%. The FTSE EPRA/NAREIT Global Index returned 7.5% in US dollar terms in the 12 months ended 31 March 2018.

Market overview

This year started off on a very positive mood driven by synchronised global growth forecasts and benefits of US tax cuts. However, towards the middle of the quarter, higher US wage numbers had triggered fears of inflation and faster than anticipated interest rate increases. The concerns about the path of US interest rates combined with growing tension in world trade between the US and China, fuelled an increase in global volatility leading to a sell-off in risky assets. On a positive note, rentals have been rising in line with economic growth and inflation in view of limited new supply in many markets and increasing occupancy levels.

Looking ahead

Although property stocks have seen some weakness recently, the drive towards global diversification continues. Global real estate may be a compelling income producing real asset to consider as a core asset class. The short-term economic outlook remains positive on the back of a positive trend in global trade activity. Global leaders and policymakers' decisions will remain key drivers in ensuring geopolitical and protectionist threats do not undermine economic growth in the longer run. The fund remains positioned to deliver returns that are aligned to the index.

Disclaimer

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. ETFs trade on exchanges like stocks and are bought and sold at market prices which may differ to the net asset value of the ETF. Additional costs (e.g. brokerage fees) may be incurred for the investor by buying or selling the ETF on the exchange. An investment in the participations of a CIS in securities is not the same as a deposit with a banking institution. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from STANLIB Collective Investments (RF) Pty Ltd (the Manager). Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Liberty is a full member of the Association for Savings and Investments of South Africa. The Manager is a member of the Liberty Group of Companies. This portfolio is valued on a daily basis at 17h00.

The manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The manager has a right to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. Additional information about this product, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge, and from the website: www.stanlib.com. The prices of unit trust funds are calculated and published on each working day. These prices are available on the Manager's website and in the South African printed news media.

Performance is calculated for the portfolio. The individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax.

A feeder fund is a portfolio that invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund.
